**JAWS Evaluation:**

- 1/7 1:02pm -Page was great. Even navigated the Exit Survey & it worked perfectly
- Table was already ADA compliant & that worked
- Flickr – The photo opened and identified the photo of Governor Sandoval and it also provided JAWS options to share, like or download.
- YouTube – would be helpful if we could display a pause button so users could stop the audio to hear JAWS as it was difficult to hear JAWS over the videos. It didn't completely walk on JAWS but did make it more difficult. Recommend making the pause, play, forward, back buttons so they are identifiable by JAWS.

- Played, but sound quality was very bad (might have been his speakers or microphone on camera because when he used headphones he could hear it properly & everything worked properly – **poor quality sound was due to the use of a microphone without a speaker.**)

**Possible Resolution:**

- **NEED to test Social Media (FLICKR, YouTube, TWITTER, Facebook)**
  - *text script (text equivalent) required for all audio & video files*
- Some YouTube videos are Closed Captioned which makes them accessible to more individuals. You will see (CC) in the description if a YouTube video is compliant (see below). On video page we added a closed captioned video for testing purposes.**
