

**Testing criteria #5: Multiple section headings on a web page – should we identify type of documents**

- Page contains 7 section headings, each containing a paragraph and a link (*ignore if they go to html pages*)
- Does the page present any contrast issues?
  - If yes, what are the issues?
- Would it be helpful for JAWS if each link was identified (PDF, WORD, EXCEL, etc?)

**Test page/Link:**

The screenshot shows a web page with a sidebar on the left and a main content area on the right. The sidebar has a 'Sections' header and a list of links: Agency HR Services, Central Payroll, Central Records, Compensation, Classification & Recruitment, Consultation & Accountability, EEO & Discrimination Investigation Unit, Office of Employee Development, and Americans With Disabilities Act. The main content area has a 'SECTIONS' header and a paragraph: 'Human Resource Management is organized into Sections that provide services to state employees, agencies and the general public.' Below this are seven section headings: Agency Human Resource Services, Central Payroll, Central Records, Compensation, Classification & Recruitment Section, and Consultation & Accountability. Each heading is followed by a paragraph of text and a bulleted list of links.

**JAWS Evaluation:**

- Yes, identifying the type of document will be helpful

**Possible Resolution:**

- **Add type to document – Review Smart forms & determine if we can make some changes to the add the type & make it required**
